Locker Survey Results

Option 1-Extension of locker bank A (orange) with the addition of 16 lockers. Keep the boot rack as is.
Option 2-Option 1 (orange) plus the addition of locker bank B (pink) with 5-10 lockers in the wall where the boot rack is. Moving the boot rack by the Pro-shop
Option 3- Option 1 (orange) & 2 (pink) plus the addition of 12 stand-alone lockers (green) where the short book rack currently is. The boot rack would be moved by the Pro-shop.
Option 4-Option 1 & 2 plus the addition of 3-4 benches where the boot rack currently is. (see green for bench placement)
Option 5-No changes

No changes or Pink & Green additional lockers if needed. Rest area left for stretching or sitting on floor
More benches
I would put double benches where the boot island is with no lockers but any option which removes the boot rack from the primary pathway to the ice surface is good
Option 4 minus Option 2
addition of locker bank (pink) plus more seating where current boot rack is (green)
All the options proposed would just clutter those area more
Option 2 and 3.
Option 1 but keep the pink area for shoe rack and add benches in the green area. Add extra shoe rack where the temporary one is now.
Heather decide
add bench at far end of room near television for additional seating and keep everything else as is
Add lockers in orange and pink and leave the boot rack (green) where it is
why not amend to 'team locker's ONLY'
Can you do all the lockers except the two orange sections that would close off the passways
Lockers anywhere OTHER than on back wall where door leads to ice sheet 1.
I like option 1 but without the lockers in front of the window area. This would be 12 new lockers.
Put in all the new lockers and add more seating near the pro shop.
Majority of orange. And pink.

I like the orange lockers filling in the same between existing lockers but not at the end. I also like the addition of the pink lockers.
Can we charge more the existing lockers
Just a slight modification to Option 3 - Move the 12 stand alone lockers to attach to the existing locker row so that when you enter into the locker area there won't be congestion right in front of the stairwell. Leave a wide walkway here before the 12 standalone lockers start.
Less lockers and more benches
DO NOT have any lockers available for rent. Temporary usage during the game currently being played.
Options 1 & 2
Refer to my comments above
no preference - I am fine to have the shoe rack moved if you want to add lockers but please keep the benches
Option 2 & 3 but not 1
Option 2 & 3, 1/2 of option 1 against the east wall, do not fill in between the other lockers, too closed in
I am ok with whatever you choose
Add pink and green (if anything at all) but NOT Orange
Adding lockers in the green and pink area while leaving the rest of the locker room as is
Option 2 lockers and partial Option 1 - leave a gap between the two current locker units.
The addition of lockers anywhere but between the two existing centre islands of lockers.
Pink green and orange excluding the orange in the middle because that would be good for traffic
As many as you can.

Option 1 but add additional benches for seating. Sometimes have to stand whee we n putting on my curling shoes.
Removal of the central lockers that face the ice for more seating
cut the lockers in half doubling the amount having the brooms on the bottom on one side and the brooms on the other side for the top locker so they cant be taken out unless the locker door is open. see this set up in a couple of curling rinks
Keep locker configuration as-is but add an additional bench under the end window where the orange box is.
Option 1 but not having lockers added in between the middle lockers currently there (just to help with better flow through) + option 2 & 3
I really don't understand the picture.
This is a public facility. Lockers should not be for rent.
Majority rules in this case, however I am a single time per week curler, so what do I need a locker for, but see my comments below.
Not option 1 but the other options are ok
All except the middle orange. Prefers the gap for traffic flow
More lockers at the back as well and only have benches in front of the windows only
Only pink
Addition of Pink and/or Green but not Orange.
Option 2 and part of Option 1. A bench instead of lockers where Option 3 is, and a bench along the glass of option 1.
Put lockers in the wall boot rack but leave the other boot rack. I don't like the boot rack by the pro shop.
